[My portfolio/website](#)

IT undergraduate student (LTI) with over 4 years of experience in data analytics, data quality, and operations management. Transitioning into Data Engineering with hands-on project experience in Python, SQL, Cloud environments (Azure SQL), and CI/CD pipelines. Proven ability to assemble, cleanse, and validate large datasets to enable data-driven decision-making and support Advanced Data Analytics workflows (including foundational Machine/Deep Learning models). Bilingual (Native Spanish, Professional English) and highly capable of analyzing data requirements for DataViz and reporting.

SKILLS

Data Engineering & Cloud: Relational Databases (SQL, Azure SQL Database), Data Modeling, Data Cleansing	Programming & Scripting: Python (Pandas, Scikit-learn, Keras), C# / .NET.
DevOps & Tools: Git, GitHub, Docker, Jupyter Notebooks, Linux/WSL.	Advanced Analytics & Reporting: Deep Learning foundations, Excel (Advanced), DataViz, metric analysis, pattern recognition.

EDUCATION

Universidad Autónoma de Nuevo León (UANL) Bachelor of Information Technology (Licenciatura en TI) | Expected Graduation: December 2026
Relevant Coursework: Data Structures, Database Management, Probability & Statistics.

Availability: Currently studying in the night-shift program; fully available for morning/afternoon work hours

EXPERIENCE

Centris - Workforce Management Analyst

Monterrey, Nuevo Leon

February 2019 - November 2022

- **Data Stewardship & Quality:** Executed data stewardship across operational datasets, ensuring cleansing and accuracy to provide highly reliable data for senior management.
- **Data Gathering & Transformation:** Assembled, reviewed, and validated large datasets to identify traffic patterns and trends, directly supporting resource forecasting.

MDY Contact Center - Information & Forecasting Analyst

Monterrey, Nuevo Leon

July 2016 - February 2019

- **Data Cleaning & Automation:** Executed data cleaning tasks to ensure data quality and leveraged the Office 365 suite, specifically Power Automate, to streamline forecasting workflows and operational reporting.
- **Data Requirements & Analysis:** Collected and analyzed relevant operational data, distinguishing between workflow inefficiencies, technical challenges, and external factors.
